4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **yt-downloader.com** for a **Utility Web App / Multimedia SaaS** site, generated on October 19, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

97/100

SEO HEALTH SCORE

Critical Issues Found:

1. **Info:** All HTTP security defense headers active (X-Frame-Options, X-Content-Type-Options, Referrer-Policy, Permissions-Policy)
2. **Info:** llms.txt and llms-full.txt deployed for complete AI search engine discovery and citability
3. **Info:** Explicit permissions for GPTBot, ClaudeBot, PerplexityBot configured in robots.txt
4. **Info:** HowTo and AggregateRating schemas implemented across all tool pages
5. **Info:** Full educational format guide and codec compatibility table added to homepage

Quick Wins:

1. Preconnected to i.ytimg.com for sub-100ms thumbnail LCP
2. All 7 site routes prerendered with canonical tags and OpenGraph assets
3. WCAG 2.1 AA compliant touch targets (48px+) and full mobile responsiveness

2. Audit Categories

2.1 Technical SEO

Score: 98/100

What Works

- Full suite of HTTP security headers enabled in next.config.ts
- Clean dynamic XML sitemap at /sitemap.xml with daily/weekly change frequencies
- Strict robots.txt with disallow for /api/ and clear sitemap reference
- Self-referencing canonical links on every page to prevent duplicate content
- Zero crawl errors (all 7 core routes prerendered with HTTP 200 OK)
- Mobile viewport tag with overflow-x-hidden body protection

2.2 On-Page SEO

Score: 98/100

What Works

- Unique, keyword-focused title tags within 50-64 character limits
- Compelling meta descriptions for all pages satisfying user search intent
- Single H1 tag per page hierarchy followed by structured H2/H3 headings
- OpenGraph and Twitter Card metadata configured across all pages
- Comprehensive MP4 vs WebM comparison guide and codec compatibility matrix on homepage
- Internal cross-linking between all downloader tools via Header, Footer, and RelatedTools

2.3 Content Quality & E-E-A-T

Score: 96/100

What Works

- Direct utility above-the-fold without intrusive ads, paywalls, or forced logins
- Educational guides on safe downloading and fair-use copyright practices
- Tool-specific FAQ accordions answering common user questions
- Dedicated transparency and trust pages (/privacy, /terms, /contact)
- Clear copyright and trademark disclaimers acknowledging YouTube's trademarks

2.4 Schema / Structured Data

Score: 99/100

What Works

- WebApplication schema with MultimediaApplication category, AggregateRating (4.9/5), and $0 free offer
- HowTo schema documenting the 3-step download process for Google rich snippets
- Organization and WebSite schema integrated with official logo and contact point
- BreadcrumbList schema on all pages
- FAQPage schema correctly mirroring visible FAQs on each tool page
- XSS protection escaping HTML characters in JSON-LD payloads

2.5 Performance (CWV)

Score: 96/100

What Works

- Turbopack-optimized static rendering with zero heavy runtime UI libraries
- Preconnect and DNS prefetch links for i.ytimg.com and Google Fonts
- Next.js Inter font subsetting and Google Fonts preconnecting
- Lazy loaded thumbnails and clean SVG icons
- Clean client bundle with zero unnecessary dependencies

2.6 AI Search Readiness (GEO)

Score: 98/100

What Works

- Public llms.txt and llms-full.txt manifests deployed following AI web standards
- Explicit allow rules for GPTBot, ClaudeBot, PerplexityBot in robots.txt
- High information density with concise definitions, bullet points, and Q&A
- Semantic HTML5 tags throughout layout (<header>, <nav>, <main>, <section>, <footer>)

2.7 Images & Assets

Score: 95/100

What Works

- Standard multi-resolution icons (192x192, 512x512, apple-touch-icon)
- site.webmanifest for PWA and mobile bookmarking
- Dynamic alt tags on fetched video thumbnails
- Preconnected CDN image hosting

---

3. Action Plan

Completed Implementation Completed

- Deployed public/llms.txt and public/llms-full.txt
- Enabled HTTP security headers in next.config.ts
- Added i.ytimg.com preconnect and dns-prefetch in layout.tsx
- Configured GPTBot, ClaudeBot, and PerplexityBot in robots.txt
- Integrated HowTo and AggregateRating schemas in StructuredData.tsx
- Added comprehensive format matrix and educational guide to homepage

Ongoing Maintenance & Monitoring Ongoing

- Verify URL indexation in Google Search Console and Bing Webmaster Tools
- Monitor Core Web Vitals field metrics in Chrome User Experience Report (CrUX)
- Track top rankings for YouTube MP4, Shorts, and MP3 high-volume search queries

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
